EDUCATION

Northeastern University, Boston, MA
Master of Science, Computer Science

September 2025 – May 2027(expected)
GPA: 4/4

Relevant Coursework: Programming Design Paradigm, Database Management System, Algorithms, Web Development.

Sardar Patel Institute of Technology, Mumbai, MH, India
Bachelor of Engineering (B. Tech), Electronics & Telecommunication

August 2016 – June 2020
GPA: 3.3/4

Relevant Coursework: Structured Programming Approach, Fundamentals of Data Structures and Algorithms.

PROFESSIONAL EXPERIENCE

Khoury College of Computer Sciences, Boston, MA

September 2025 - Present

Khoury College Teaching Assistant - CS 3200 (Undergrad DBMS), CS 5200 (Graduate DBMS)

- Teaching Assistant for undergraduate and graduate DBMS courses, designing SQL-focused assignments, rubrics, and assessments while mentoring students and managing grading workflows.
- Returning TA for CS 5200 based on strong DBMS and SQL proficiency, supporting advanced database concepts, query optimization, and student learning outcomes.

Dell Technologies, Remote

July 2023 – August 2025

Software Engineer 2 - Java Developer

- Spearheaded automation initiatives within the Order Management team by streamlining certificate and Java upgrade activities across 150+ microservices, saving over 750 developer hours and boosting efficiency.
- Orchestrated the integration of Mexico into Dell's Globalization Program and introduced new payment solutions (Dell Pay & Pay Pro) for the U.S. markets, driving over \$10 million in revenue within the first month of production.
- Mentored and onboarded new team members through structured Knowledge transfer sessions and guidance, reducing ramp-up time by 30%, accelerating their project contributions while adhering to organizational standards.

Deloitte US Consulting, Mumbai, India

September 2021 – July 2023

Technology Analyst

- Programmed and maintained high-performance Spring Boot applications for a global technology giant, leveraging Java, NoSQL, Elasticsearch, and RabbitMQ to seamlessly process daily transactions exceeding \$200 million.
- Led from the forefront in migrating 17 applications from legacy code to a modern and scalable technical architecture, reducing latency and downtimes with a reduction in 60% security vulnerabilities.

Larsen & Toubro Infotech (LTIMindtree), Mumbai, India

January 2020 – September 2021

Senior Software Engineer

- Architected full-stack web applications for the Power Portfolio Management Team, independently bridging business analysis and software development using Java, Spring MVC, and PL/SQL, streamlining portfolio operations.
 - Earned a skip-level promotion by spearheading the migration of an energy trading solution from a licensed enterprise suite to a custom built platform, eliminating \$27000 in annual licensing while enhancing system flexibility.
-

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, Typescript, SQL, Oracle PL/SQL, R programming
 - **Backend:** Spring Boot, REST APIs, Microservices, Kafka, RabbitMQ, Elasticsearch, NoSQL, Relational Databases
 - **Frontend:** Angular, HTML, CSS
 - **AI & Data:** LLM Models, Prompt Engineering, Vector Databases
 - **DevOps, Tools & Engineering:** Docker, Kubernetes, CI/CD, Git, Jira, Agile, SDLC, Operating Systems
-

NOTABLE PROJECTS

Story Copilot (Dell GSCS Hackathon)

Pioneered a GenAI-powered tool to analyze Jira story efficiency and auto-generate acceptance criteria using Prompt Engineering, Python, LLMs, and Vector Databases(Patent Pending), adopted by 70+ product managers within 3 months.

Customer Transport Portal

Designed and developed a dynamic web application using Java, Spring Boot and SQL to digitize and streamline employee transport requests, reducing processing time by 40%.
